<h2>Most 'Patriot' Bodies Are Red Cells--Hebert</h2>			
<p>Taking issue with critics of the Central Intelligence Agency, Rep. F. Edward Hebert has asked how many American student organizations get funds from foundations supported financially by Communist-front organizations.</p> <p>"I have not heard anybody raise a voice or come forward with that question," Hebert said in an interview yesterday.</p> <p>THE LOUISIANA congressman said that from his experience on the House Un-American Activities Committee, nine of 10 organizations which carry expressions for love of country and patriotism are Communist cells duping the people.</p> <p>"They are using the Constitution of the United States and its protection to destroy it," he said.</p> <p>He said the publicity given the CIA episode had done more damage than if the enemy had sunk one of our submarines or aircraft carriers.</p> <p>HE SAID THE critics belonged in never-never land or out on a cloud because they did not understand the realities and the basic necessities America had to meet to remain free.</p> <p>He likened critics of the CIA to those of the Vietnam war. He said in both instances the fight was to protect and guarantee liberty to those very people.</p>
